It's like space invaders, but with a pumpkin.. The game isn't anything too special, just a pretty badly made clone of Archanoid or DX-Ball. I can say it is playable for like 3 minutes and then you already get bored of it. Thumbs up for the achievements though, they're great.. Great game if you're bored, beat the game in 116 minutes.. Achievement #397 is very challenging. Bought for 9 cents, and it has great achievements
